🔗 [LeetCode](#)

Flutter and Android Developer with hands-on internship experience building production mobile applications using **Flutter, Dart, Kotlin, Jetpack Compose, REST APIs, and Firebase**. Skilled in **API integration, debugging, performance optimization, UI/UX development, SSL pinning, CI/CD, and Google Play Console deployment** across Android and iOS.

EXPERIENCE

Flutter Developer — Promoted from Intern

July 2026 - Present

Welyft Pte Ltd

Singapore, Remote

- Contributed to production Flutter applications **Welyft Ryder** and **WeMove** across Android and iOS, focusing on API integration, feature development, debugging, and optimization.
- Implemented **RESTful APIs**, enhanced **Welyft Ryder** with **SSL Pinning**, UI/UX improvements, and a battery percentage indicator.
- Optimized **WeMove** startup using asynchronous service pre-loading and Flutter frame deferral, reducing splash-screen lag by approximately **45%**.
- Contributed to new feature development and gained hands-on experience with **Google Play Console** release and production workflows.

Flutter Developer Intern

May 2026 - July 2026

Techsteck Solutions LLP

Faridabad, Haryana

- Developed cross-platform Flutter applications for client projects including **E-commerce, Food Delivery, Cab Booking, and Urban Services**.
- Developed **Android and iOS** applications for US-based client **KeyLinkRentals.ca**, while contributing to its existing React.js platform.
- Worked on **CI/CD and deployment workflows** using **GitHub and Vercel**, with hands-on experience in **Google Play Console** releases.

Android Developer Intern

April 2025 - Aug 2025

Alpixn Technologies Private Limited

Gurugram, Haryana

- Developed client-based Android applications using **Kotlin and XML**, implementing responsive layouts and reusable UI components.
- Implemented **API integration, navigation, UI development, and data handling** while debugging and improving application functionality.
- Collaborated with the development team to deliver reliable Android solutions aligned with client requirements.

PROJECTS

Event Hive – Club Event Management App [🔗](#)

Jan 2026

- Developed a club event management platform using **Kotlin, Jetpack Compose, Firebase Authentication, and Firestore**.
- Implemented **event creation, registration, and real-time participant tracking** with secure cloud-based data synchronization.
- Applied **MVVM, ViewModel, and repository patterns** to improve scalability, maintainability, and separation of concerns.

UniLink – Campus Lost & Found Platform [🔗](#)

Mar 2025

- Developed a cross-platform platform using **Flutter, Dart, Riverpod, GoRouter, and Firebase**, supporting Android, iOS, and Web from a single codebase.
- Implemented real-time item tracking with **Cloud Firestore Streams, Firebase Authentication, and Storage** for synchronized reports, claims, and status updates.
- Built a secure finder-owner workflow with **claim requests, deep linking, push notifications, profile verification, and an automated Karma reward system**.

TECHNICAL SKILLS

Languages: Kotlin, Java, Dart, Python, SQL

Android Development: Android SDK, Jetpack Compose, MVVM, Clean Architecture, Navigation Component, Kotlin Multiplatform (KMP)

APIs & Backend: REST APIs, Retrofit, OkHttp, JSON, Firebase Authentication, Firestore, Cloud Functions, FCM

Databases & Storage: Room, SQLite, SharedPreferences, MongoDB

Cross-Platform: Flutter, BLoC, Provider

Tools: Git, GitHub, Android Studio, VS Code, Postman, Figma, Firebase Console

ACHIEVEMENTS AND CERTIFICATIONS

- Open Source Contributor — GSSOC, OSCI, SSOC
- Runners Up — CodeNCraft Hackathon, IIIT Bhubaneswar
- Gen AI Exchange Hackathon Participant
- Android Development Internship Course

LEADERSHIP AND CONTRIBUTIONS

- Event Lead, Google Developer Groups on Campus (GDGoC), Silicon University
- Mentored students in Android Development and Kotlin through online sessions
- Open-Source Contributor, FoodExpirationDates — GitHub Pull Request [#555](#)
